

Taming Turbulence

Turbulence can run the gamut from a choppy annoyance to creating loss of control and safety of flight events. Knowing how to detect and avoid turbulence is a critical part of flight planning, managing passenger expectations or even making a go/no go decision. We'll review the latest tools to help you determine where turbulence currently exists, where it's forecast to develop and how to better use those insights to plan and operate in order to minimize the impact of turbulence on future flights.

Directions: On the grounds of AirVenture 2015, the EAA Proficiency Center is located on W. Waukau Ave. between Knapp St. and Airport Drive.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
